ABOUT THIS GUIDE

This section introduces you to the *NCIA 2.3 User's Guide*. It includes the following topics:

- *Purpose* on this page
- *Audience* on this page
- *Topics Covered* on page vii
- *Additional References* on page viii
- *Text Conventions Used* on page viii

Purpose

This guide provides an overview of National Cancer Imaging Archive (NCIA). It explains how to use NCIA to access local, and if available, remote imaging archives.

Audience

The *NCIA 2.2 User's Guide* is the documentation for the NCIA web-based application. The intended audience for this guide are researchers including pathologists and radiologists at cancer centers, academia, and industry that access NCIA through commonly available web browser software.

Topics Covered

The *NCIA User's Guide* discusses the following topics:

- *Chapter 1* provides an introduction to NCIA and describes how to access NCIA.
- *Chapter 2* describes how to search the local and any selected remote image databases.
- *Chapter 3* discusses administration functions in NCIA.
- *Appendix A* provides a list of URL references referred to within the text.
- *Appendix B* includes a list of abbreviations and their meanings.
- *Index* references key words and terms.

Additional References

To visualize images with the Cedera I-Response Workstation software, refer to Cedera documentation.

Text Conventions Used

This section explains conventions used in this guide. The various typefaces represent interface components, keyboard shortcuts, toolbar buttons, dialog box options, and text that you type.

<i>Convention</i>	<i>Description</i>	<i>Example</i>
Bold	Highlights names of option buttons, check boxes, drop-down menus, menu commands, command buttons, or icons.	Click Search .
<u>URL</u>	Indicates a Web address.	http://domain.com
text in SMALL CAPS	Indicates a keyboard shortcut.	Press ENTER.
text in SMALL CAPS + text in SMALL CAPS	Indicates keys that are pressed simultaneously.	Press SHIFT + CTRL.
<i>Italics</i>	Highlights references to other documents, sections, figures, and tables.	See <i>Figure 4.5</i> .
<i>Italic boldface monospace type</i>	Represents text that you type.	In the New Subset text box, enter <i>Proprietary Proteins</i> .
Note:	Highlights information of particular importance	Note: This concept is used throughout the document.
{ }	Surrounds replaceable items.	Replace {last name, first name} with the Principal Investigator's name.

GETTING STARTED IN NCIA 2.3

This chapter describes how to use NCIA.

Topics in this chapter include:

- [Introduction to NCIA](#) on this page
- [Creating a New User Account](#) on page 2
- [Logging into NCIA](#) on page 3
- [Using the NCIA Home Page](#) on page 4
- [Using the NCIA Home Page](#) on page 7
- [Using NCIA Online Help](#) on page 11
- [Application Support](#) on page 12

Introduction to NCIA

NCIA provides the cancer research and medical community, industry, and academia access to the local NCIA imaging archive, and if available, remote imaging databases that can be used for many purposes, including the potential to assist in the development and validation of analytical software tools supporting these functions:

- Lesion detection and classification software
- Accelerated diagnostic imaging decision
- Quantitative imaging assessment of drug response

Note: If the Remote Search option appears on the NCIA home page, you can search remote imaging archives located outside of the local NCIA archive.

The archives provide access to imaging resources that improve the use of imaging in today's cancer research and practice by increasing the efficiency and reproducibility of imaging cancer detection and diagnosis, leveraging imaging to provide an objective

assessment of therapeutic response, and ultimately enabling the development of imaging resources that will lead to improved clinical decision support.

Clinical trials, physicians and other researchers submit images to NCIA using the MIRC (Medical Imaging Resource Center) software. Any potential user may then access NCIA to search for and download images and associated annotation files.

Images are stored in the medical image standard, Digital Imaging and Communications in Medicine (DICOM). A DICOM file stores the digital image along with a series of tags that contain metadata about the image such as patient ID, study ID, patient weight, anatomic site, and so forth. For more information about DICOM, see <http://medical.nema.org/>.

NCIA is accessible at <https://imaging.nci.nih.gov>. In the Welcome/Login page that opens, you can perform the following tasks:

- Learn the basics about NCIA by reading the welcome page introduction
- Open a window that provides links for downloading DICOM viewers
- Open Quick Links to websites relevant to the goals and tasks of NCIA. See *Home Page Left Sidebar* on page 5.
- Register for a new user account.
- Log into NCIA.

Creating a New User Account

To register a new user in NCIA, from the NCIA welcome and login page, follow these steps:

1. Click the **Register** hypertext link under the **Login** button.
2. In the registration form that opens (*Figure 1.1*), enter the required information. Items with an asterisk are required fields.

USER REGISTRATION

NAME

Title: *First Name: Middle Initial: *Last Name:

CONTACT INFORMATION

*Email: Phone: Fax:

Organization Name: *Address:

*City: *State/Province:

*Country: *Postal Code:

LOGIN INFORMATION

Please enter an e-mail address (to be used as a login ID) and a password. Your selections will be saved and future visits will require input of this information.

*Email Address: *Password: (Minimum of 5 characters are required)

*Retype Password:

REGISTER **CANCEL**

Figure 1.1 New user registration form

3. Click **Register** to execute the submission of the user information. Click **Cancel** to return to the login screen.

Once you have submitted your entry form, you are forwarded to the home page and you are granted immediate access.

Logging into NCIA

When you click the <https://imaging.nci.nih.gov> to access NCIA and indicate your agreement on the Legal Rules of the Road, the welcome/login page displays.

Figure 1.2 NCIA Welcome/Login page

If you have already registered with NCIA, perform the following steps to login from the User Login panel (Figure 1.2).

1. Enter the login information, your **EMAIL** and **PASSWORD**.
2. Click **Login**.

Note: If your EMAIL or PASSWORD is not correct, the following error message displays: **Invalid username/password. Please try again.**

If you do not have a login ID or password, click **Register** to apply for a user account. For more information, see *Creating a New User Account* on page 2.

3. The NCIA home page is updated to include the NCIA application.

Note: If you launch a search of the NCIA database from another application, when you do so, you are brought to the NCIA login page. Use the same login instructions in steps 1 through 3 above.

Using the NCIA Home Page

The NCIA welcome/home page that opens after login displays several panels and menu bars (*Figure 1.3*).

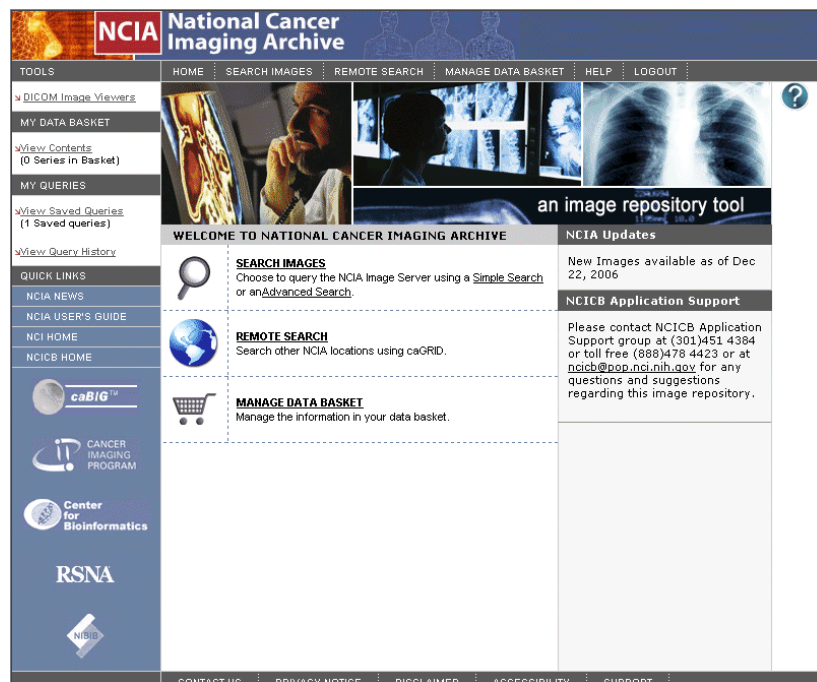

Figure 1.3 NCIA home page after login

Home Page Menu Bar

The top menu bar on the welcome/home page consists of the options described in *Table 1.1*.

Option	Description	See for More Information
Home	Returns you to the NCIA Home page	N/A
Search Images	Displays the Simple Search page	<i>Performing a Simple Search</i> on page 15
Remote Search	Displays the Search Remote Sites page This function is available only when NCIA is configured for remote image sites.	<i>Specifying Remote Search Sites</i> on page 13
Manage Data Basket	Displays the My Data Basket page; This is the same option as choosing My Data Basket > View Contents from the side menu bar.	<i>Managing the Data Basket</i> on page 39
Help	Displays a separate online Help window	<i>Using NCIA Online Help</i> on page 11

Table 1.1 NCIA home page menu bar options

Option	Description	See for More Information
Logout	Logs you out of NCIA and returns you to the NCIA home page	N/A

Table 1.1 NCIA home page menu bar options

Home Page Left Sidebar

The left sidebar of the Welcome page down through **My Queries** consists of the options described in [Table 1.2](#).

Option	Description	See for More Information
Tools > DICOM Image Viewers	Displays the DICOM Viewer Links window	<i>Obtaining DICOM Viewers</i> on page 41
My Data Basket > View Contents	Displays the My Data Basket page	<i>Managing the Data Basket</i> on page 39
My Queries >View Saved Queries	Displays the Saved Queries page	<i>Managing Saved Queries</i> on page 28
My Queries >View Query History	Displays the Query History page	<i>Viewing a Query History</i> on page 31
Tools > QA Tool	Allows a curator to evaluate a submission and assign a QA status	<i>Using the Quality Assurance (QA) Tool</i> on page 43
Tools > Upload Curation Spreadsheet	Provides the means to upload and parse an annotation spreadsheet	<i>Uploading and Parsing the Curation Spreadsheet</i> on page 45
Tools > Verify Submission	Verifies an image submission and its status through a report	<i>Verifying Submitted Files</i> on page 46

Table 1.2 NCIA home page left sidebar options

Quick Links

The **Quick Links** menu options on the lower left sidebar displayed in most NCIA viewers provide sources for NCIA- and NCI-related bioinformatics information on the Internet. The options are described in [Table 1.3](#).

Option	Description	See for More Information
Quick Links > NCIA News	Displays the NCIA News page in a separate window.	<i>Using NCIA News Page</i> on page 8
Quick Links > NCIA User's Guide	Opens a pdf version of the NCIA User's Guide.	N/A
Quick Links > NCI Home	Displays the NCI home page in a separate window.	N/A
Quick Links > NCICB Home	Displays the NCICB home page in a separate window.	N/A

Table 1.3 Left sidebar Quick Links

Other Home Page Panels

The various panels of the welcome/home page display an additional variety of options described in [Table 1.4](#).

Option	Description	See for More Information
Center Panel		
Search Images	Displays the Simple Search screen	<i>Performing a Simple Search</i> on page 15
Simple Search	Displays the Simple Search screen	<i>Performing a Simple Search</i> on page 15
Advanced Search	Displays the Advanced Search screen	<i>Performing an Advanced Search</i> on page 22
Remote Search	Displays the Search Remote Sites screen	<i>Specifying Remote Search Sites</i> on page 13
Manage Data Basket	Displays the My Data Basket page	<i>Managing the Data Basket</i> on page 39
Right-hand panel		
NCIA Updates	Displays the last date and time visible images were made available. This date reflects the last update of any images and does not consider whether you have access to them.	N/A
NCICB Application Support	Displays phone numbers to contact NCICB Application Support. See	<i>Application Support</i> on page 12.
Bottom menu bar		
Contact Us	Displays an email addressed to ncicb@pop.nci.nih.gov so you can email questions to NCICB application support	N/A
Privacy Notice	Displays the Health and Human Services (HHS) Privacy Policy Notice.	N/A
Disclaimer	Displays the NCIA Legal Rules of the Road disclaimer.	N/A
Accessibility	Displays the NCI Web Accessibility Feedback Form to be used by users with disabilities who have comments about the accessibility of NCI's web pages.	N/A
Support	Displays the Welcome to the NCICB Application Support Site web site.	N/A

Table 1.4 NCIA home page welcome panel options

Using NCIA News Page

To open the NCIA News page, click on the corresponding link under *Quick Links* on the lower left sidebar of any NCIA page.

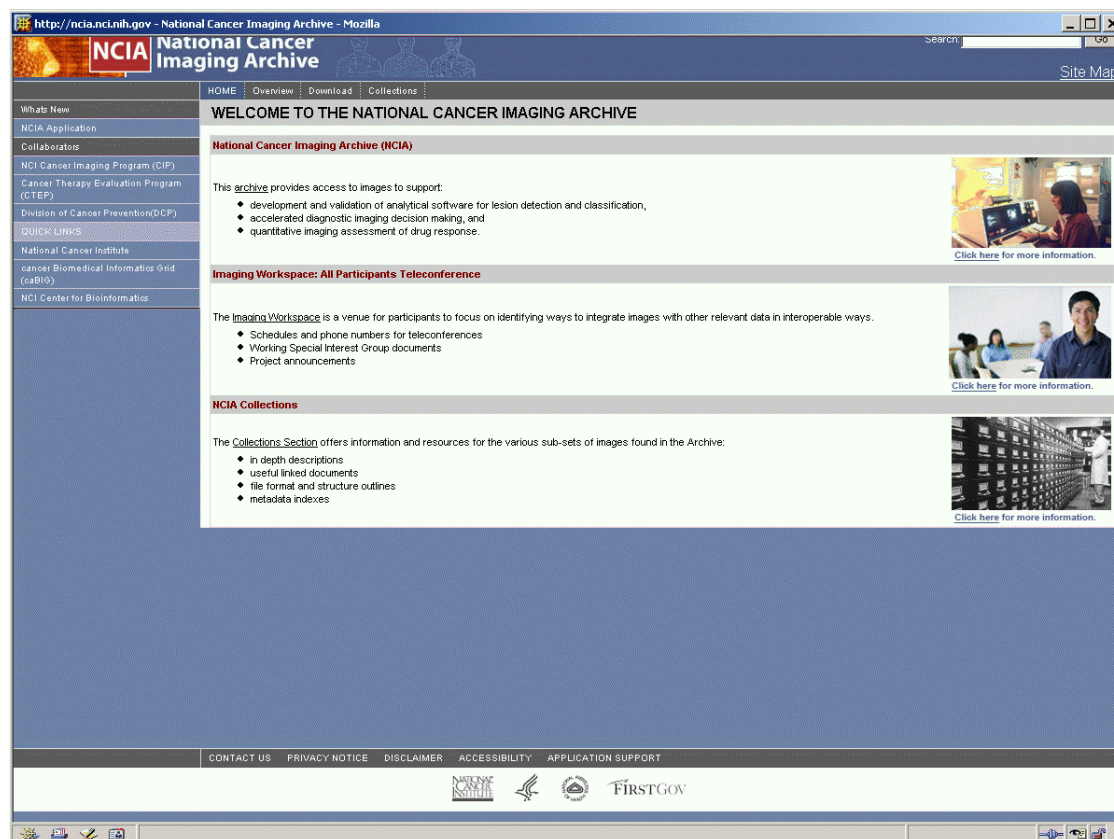

Figure 1.4 NCIA news page

The NCIA News page (*Figure 1.4*) consists of a center panel that displays current NCIA-related information as well as sidebar and menu bar options that navigate to websites and NCIA pages relevant to your tasks.

News Page Menu Bar

The News page top menu bar (*Figure 1.4*) consists of the options described in *Table 1.5*.

Option	Description
Home	Returns you to the NCIA News home page
Overview	Provides an overview of NCIA and its goals
Download	Displays NCIA software available for download (Descriptions are included in <i>News Page Left Sidebar</i>).
Collections	Describes existing and future collections.

Table 1.5 News page top menu bar descriptions

News Page Site Map

Click the **Site Map** link in the upper right hand corner of the News page to display a list of site map information provided in the center panel (see [Figure 1.5](#)).

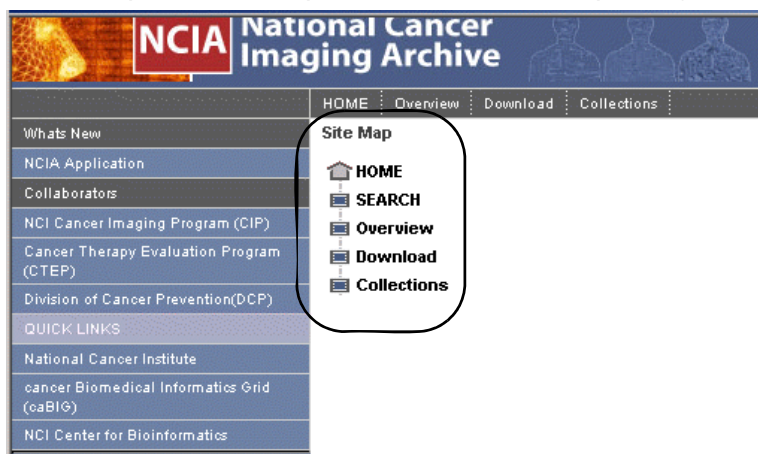

Figure 1.5 News page Site Map

These Site Map links are similar to the menu bar options on the page, described in *Other Home Page Panels* on page 6.

If you click the **Download** menu option or the link in the Site Map, each takes you to a Download page that has a link to the NCICB Download Center, where you can download NCIA 1.4 and its related files. For more information, refer to <https://imaging.nci.nih.gov>.

News Page Left Sidebar

The left sidebar of the News page down through **Collaborators** consists of the options described in [Table 1.6](#). For more information about the Quick Links options, see *Quick Links* on page 6.

Option	Description
NCIA Application	Contains a link to the NCIA application
Collaborators > NCI Cancer Imaging Program (CIP)	Displays the CIP website in a separate browser window
Collaborators > Cancer Therapy Evaluation Program (CTEP)	Displays the CTEP website in a separate browser window
Collaborators > Division of Cancer Prevention (DCP)	Displays the DCP website in a separate browser window

Table 1.6 News page left sidebar descriptions

Using NCIA Online Help

The online help has been written to help you master the NCIA software.

To access online help in NCIA, use any of the following methods:

- Click the **Help** menu option on the top menu bar to open the complete online help project or a Guided Tour.
- **Note:** You can access online help without being logged into NCIA.
- Click the **Help** icon or button at the top of each page to open a context sensitive topic.
- Click a **Guided Tour** link then click one of the **here** links to start an online tutorial on how to register for NCIA or the basic steps to use NCIA.

Once you are in online help, an array of options helps you locate topics of interest.

- Context-sensitive help displays online help topics that correspond to the “form” or page from which help was opened. Click the TOC button () at the top left of the title bar to open the full online help directory.
- Follow hypertext links or the **Related Topics** buttons in the help topics to open other closely related topics.

Note:

Only the person v
model. Permission
people--the subm
For more informat

Related Topics

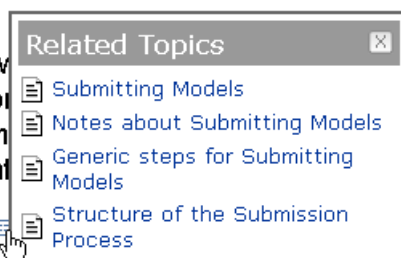

Figure 1.6 Related Topics button and associated list

- Locate topics using the table of contents that displays in the left pane of the online help project or the Index tab that displays at the top of the Table of Contents pane.
- Perform word searches of Help by entering query text in the search text box.

Note: A monitor resolution of greater than 800x600 is highly recommended for these guided tours. If you have problems viewing the online tutorials, you may need to install the Flash Plug-in for your browser. Go to the Macromedia website to download this free plug-in (http://www.macromedia.com/shockwave/download/download.cgi?P1_Prod_Version=ShockwaveFlash).

Accessing NCIA from Another Application

Searches in NCIA can be launched from other applications configured with this feature. For specific information about launching NCIA from another application, refer to the online help or user documentation from that application.

When NCIA is launched by a search defined and initiated from another application, the system runs the query, then opens to the NCIA login page where you must login to see the search results. This search feature is designed to search the image repository to find images specified by the link in the other application, then to display images as identified there. Once you are logged into NCIA, if the search is successful, NCIA displays a viewer showing one or more search result image(s) you defined in the other application.

Example:

This feature is found in the calIntegrator application, I-SPY. The application I-SPY can launch a search for images identified as “before” and “after” (such as before and after treatment). If the search is successful, the before and after shots specified in the search criteria would display in NCIA. For I-SPY, see the download page on the NCICB website: <http://ncicb.nci.nih.gov/download/>.

From this Search Results page that opens in NCIA, you can perform the following actions:

- Click **Add to Basket** to add the image to the Data Basket.
- Click **View Series** to display the Images for Series page. This page displays all of the image thumbnails for the series containing the image(s) displayed above the link.
- Click **Open Full Size JPEG** to display the image in full size mode (in a separate browser window).

Application Support

For any general information about the application, application support or to report a bug, contact NCICB Application Support.

Email: ncicb@pop.nci.nih.gov	When submitting support requests via email, please include: <ul style="list-style-type: none">• Your contact information, including your telephone number.• The name of the application/tool you are using• The URL if it is a Web-based application• A description of the problem and steps to recreate it.• The text of any error messages you have received
Application Support URL	http://ncicb.nci.nih.gov/NCICB/support
Telephone: 301-451-4384 or toll free: 888-478-4423	Telephone support is available Monday to Friday, 8 am – 8 pm Eastern Time, excluding government holidays.

CHAPTER 2

SEARCHING FOR IMAGES

This chapter describes how to use NCIA.

Topics in this chapter include:

- *Specifying Remote Search Sites* on page 13
- *Performing Searches* on page 14
- *Working with Saved Search Queries* on page 26
- *Viewing Search Results* on page 32
- *Working with the Data Basket* on page 38
- *Obtaining DICOM Viewers* on page 41
- *Initiating Searches from Other Applications* on page 41

Specifying Remote Search Sites

A remote search site is an image database residing outside of the local NCIA imaging archive. When you select a remote image database, Simple, Advanced, and Annotation Keyword Search pages display search results for the local NCIA imaging archive AND any selected remote sites.

Note: If there are no remote sites configured during installation, the Remote Search function does not display on the NCIA home page.

To select remote search sites, follow these steps:

1. Initiate the search by following one of these options:
 - Click **Remote Search** from the top menu bar.
 - Click the **Remote Search** link in the Welcome panel or on the menu bar

Any of these options open the Search Remote Sites page ([Figure 2.1](#)).

Figure 2.1 Search Remotes Sites

“Local” represents the NCIA imaging archive that you are currently logged into. “Local” is always selected and cannot be unchecked. Any disabled remote sites are not available.

2. Select the remote site(s) that you want to search, and click the **Submit** button.

The Simple Search page appears. For more information about simple searches, see [Performing a Simple Search](#).

Performing Searches

NCIA enables you to search for images in the local NCIA *in vivo* image repository, and if available, use the Remote Search function to search in remote imaging archives.

NCIA is designed to perform the following tasks:

- Search for images in simple or advanced search mode
- Combine search criteria defined in those searches with keyword searches of curated annotation data
- Save the search queries to be used repeatedly
- Review query histories
- As subjects, studies, series or images are located, save them to your data basket for download

Note: When you download a series that have annotation files (indicated by **Yes** in the **Contains Annotations** column), they are automatically downloaded as well.

The NCIA submissions are organized in the following hierarchy, which is important to remember in creating your search query and reviewing search results:

Clinical trial > Patient (Subject) > Study > Series > Images

NCIA provides three search modes:

- Simple Search
- Advanced Search
- Annotation Keyword Search

Some search pages contain toggle buttons to allow you to switch back and forth between the Simple Search and Advanced Search pages.

Each search page contains selection boxes, drop-down lists and text fields. Selected objects are used as search criteria.

1. Selection Boxes.

- To move an item from the **Available** box to the Selected panel, highlight it in the Available box and click **Select**.
- Click **Select All** to select all available items and move them to the Selected panel in one keystroke.
- To remove an item from the Selected panel, highlight the item(s) and click **Remove** or click **Remove All** to remove all items.

2. Drop-down Lists. Click on a drop-down list arrow and select the appropriate choice.

3. Text fields. Enter the information requested.

Performing a Simple Search

A simple search consists of basic criteria; they can be expanded for an advanced search. All simple searches are made at the series level from the Simple Search page

Perform the following steps to complete a Simple Search.

1. Initiate the search by following one of these options:

- Click **Search Images** from the top menu bar.
- Click the **Search Images** link in the Welcome panel or on the menu bar
- Click the **Simple Search** link in the Welcome panel.
- From the Advanced Search page, click the **Simple Search** button in the upper right hand corner. The Simple Search page displays with the basic criteria that may have already been selected.

Any of these options open the Simple Search page. The Remote Sites Selected table lists the remote databases to be searched outside the local NCIA imaging archive ([Figure 2.2](#)).

Simple Search ?

*All searches are conducted at the series level

*Different types of criteria are ANDed together when searching. Different values for the same criteria are ORed together. For example, if two modalities and two collections are selected, results will be returned that match at least one of the selected modalities and at least one of the selected collections.

*Default equals "All"

Figure 2.3 Simple Search Criteria

- Choose the search criteria described in *Table 2.1*.

Simple Search Criteria	Description
Image Modality(ies)	Select from the available image classifications. If none are selected, then the search returns data for all modalities.
Contrast	Select from the drop-down list: <ul style="list-style-type: none"> Enhanced Un-enhanced Either Enhanced or un-enhanced
Anatomical Site	Select from the available anatomical sites. If none are selected, then the search returns data for all anatomical sites.

Table 2.1 Simple Search criteria

Simple Search Criteria	Description
Image Slice Thickness	<p>Select Image Slice Thickness to allow you to select a thickness range or number. Use the first set of drop-down boxes only to select one thickness by using (=), greater than (>) or greater than or equal to (>=) to a selected thickness. For example, for a thickness greater than 5mm, select the following:</p>  <p>Use both sets of drop-down boxes to select a range of numbers. For example, for a range between 3mm and 7 mm, select the following:</p>  <p>If you do not select this, then the search returns data for all image slice thicknesses.</p>
Collection(s)	<p>Collections are NCI-defined groupings of image data sets. Select from the available collections. Select from the available collections. If none are selected, then the search returns data for all collections.</p> <p>Click Collection Descriptions for more information about the collections.</p>
Annotations	<p>Select Only include series that have annotations to search for annotations. If you do not select this, then the search returns series that have annotations and do not have annotations.</p>

Table 2.1 Simple Search criteria (Continued)

3. Click the appropriate button to initiate, enhance or reset the search.
 - a. Click **Submit** to start the search. The Search Criteria and Search Results (by Subject) pages display (see *Viewing Search Results* on page 32).
 - b. Click **Add Keyword Criteria** to search curation data with selected keywords. This option takes you to the Annotation Keyword Search page. See the following section.
 - c. Click **Reset** to reset the search criteria to their default values.

After a search is submitted, if you specified to search remote image databases, the Remote Site(s) Selected table lists those sites. Search criteria are summarized in a Criteria Selected table. For more information about search results, see *Viewing Search Results* on page 32.

Searching Curation Data

NCIA allows you to submit either image files (DICOM) or annotation files. Annotation files are typically either markup XML (files describing lines drawn on an image) or reports of some kind (for example, pdfs of radiologist reports). The image data is parsed into the database and is searchable on the Simple or Advanced Search pages. Data in the annotation fields is not searchable: you can only search to see whether or not series containing images also have associated annotation files. (This is the **Series with Annotations Only** field on the Simple Search page.)

To make the data in NCIA more valuable to researchers, NCI has a curator who looks at the images and creates “curation data” about them. This could be clinical outcomes (patient survived or died?) or analysis (number of lesions, etc). The curation data is uploaded into NCIA by someone with Admin permissions using the Upload Curation Spreadsheet feature. For more information, see *Uploading and Parsing the Curation Spreadsheet* on page 45. Once the data has been uploaded, the curation data is available for search on the Annotation Keyword Search page. See the following section.

Annotation Keyword Search Page

Note: In an annotation keyword search, there are no user defined keywords. You will select from among appropriate keywords assigned the annotation files by curators.

To perform an annotation keyword search, follow these steps:

- 1. Click the **Add Keyword Criteria** button on either the Simple Search page or the Advanced Search page.

This opens the Annotation Keyword Search page (*Figure 2.4*).

Annotation Keyword Search

This page allows you to search for series based on annotation keywords and their values.

First, choose the search terms on which you would like to search. Then, press the "Display Keywords" button to view the keywords available for each search term.

Lung Lobe of Nodule	<table border="1"> <thead> <tr> <th>Available</th> <th>Selected</th> </tr> </thead> <tbody> <tr> <td>LUNG LUL LUNG RML LUNG RUL Lingula</td> <td>LUNG LLL LUNG RLL</td> </tr> </tbody> </table>	Available	Selected	LUNG LUL LUNG RML LUNG RUL Lingula	LUNG LLL LUNG RLL
Available	Selected				
LUNG LUL LUNG RML LUNG RUL Lingula	LUNG LLL LUNG RLL				

SUBMIT RESET

Figure 2.5 Expanded Annotation Keyword Search page

- a. At this point, additional keywords (CDEs) to your search terms have been added in the **Available** panels. Move any terms you want to add to your criteria to the appropriate selected boxes.
- b. If the available data is numeric, define the data from a range field (circled in [Figure 2.5](#)).
9. Once you have finished defining criteria, click **Submit** to execute the search.

10. Click **Reset** to clear fields of all criteria. This moves you back to the initial Annotation Term Search page. The criteria you selected in the Simple or Advanced Search pages still displays in summarized table format.

Searches are based on criteria named on Simple or Advanced Search pages, plus criteria specified on this Annotation Keyword Search page.

Results display as described in *Viewing Search Results* on page 32.

Performing an Advanced Search

An Advanced Search has all fields available for a Simple Search, as well as expanded options. All advanced searches are made at the series level from the Advanced Search page.

To perform an Advanced Search, follow these steps:

1. Initiate the search by following one of these options:
 - Click the **Advanced Search** link in the Welcome panel of the NCIA home page.
 - Click the **Advanced Search** link on the Simple Search page. Criteria that you may have already selected on the Simple Search page displays on the Advanced Search page.

These options open the Advanced Search page. The Remote Sites Selected table lists the remote databases to be searched outside the local NCIA imaging archive ([Figure 2.6](#)).

Advanced Search 

*All searches are conducted at the series level

*Different types of criteria are ANDed together when searching. Different values for the same criteria are ORed together. For example, if two modalities and two collections are selected, results will be returned that match at least one of the selected modalities and at least one of the selected collections.

*Default equals "All"

 **SIMPLE SEARCH**

Figure 2.7 Advanced Search page

2. Choose the search criteria as described in Table 2.2.

Advanced Search Criteria	Description
Image Modality(ies)	Select from the available image modalities. If none are selected, then the search returns data for all modalities.
Contrast	Select from the drop-down list. For example, <ul style="list-style-type: none"> Enhanced Un-enhanced Either Enhanced or un-enhanced
Anatomical Site	Select from the available anatomical sites. If none are selected, then the search returns data for all anatomical sites.

Table 2.2 Advanced Search Criteria

Advanced Search Criteria	Description
Image Slice Thickness	<p>Select I would like to filter by Image Slice Thickness to allow you to select a thickness range or number. Use the first set of drop-down boxes only to select one thickness by using (=), greater than (>) or greater than or equal to (>=) to a selected thickness. For example, for a thickness greater than 5mm, select the following:</p>  <p>Use both sets of drop-down boxes to select a range of numbers. For example, for a range between 3mm and 7 mm, select the following:</p>  <p>If you do not select this, then the search returns data for all image slice thicknesses.</p>
Previous Minimum Number of Studies	Patients are selected if more than the entered number of studies has been performed on the patient. It is specified as baseline (first visit) plus the number of subsequent visits. Select a number from the drop-down list.
Number of Months between Baseline and Final Study	This allows selection of cases with the desired amount of follow-up. Select equal (=), greater than (>), greater than or equal to (>=), less than (<) or less than or equal to (<=) from the drop-down list and enter the desired number of months.
Collection(s)	Collections are NCI-defined groupings of image data sets. Select from the available collections. Select from the available collections. If none are selected, then the search returns data for all collections. Click Collection Descriptions for more information about the collections.
Annotations	Select Only include series that have annotations to search for annotations. If you do not select this, then the search returns series that have annotations and do not have annotations.

Table 2.2 Advanced Search Criteria (Continued)

Modality Manufacturer	
Manufacturer Model(s) Software Version	<input type="checkbox"/> All Manufacturers <input checked="" type="checkbox"/> GE MEDICAL SYSTEMS (13) <input type="checkbox"/> SIEMENS[dev] (6) <input type="checkbox"/> TOSHIBA (1) <input type="checkbox"/> DeJarnette Research Systems (1) <input checked="" type="checkbox"/> Philips Medical Systems (1) <input type="checkbox"/> VARIAN Medical Systems (1)

Figure 2.8 Modality Manufacturer Search Criteria

Criteria	Description
Manufacturer Model Software Version	<p>This option displays a tree view of the manufacturers, models and software versions for the image modality. The number in parentheses indicates the number of items under that branch of the tree.</p> <ul style="list-style-type: none"> Click on the plus sign to expand a branch of the tree or click on the minus sign to collapse a branch of the tree. Select a manufacturer, model or software version for your search by clicking in the box next to the item. Any items under the branch you selected are automatically selected for you. For example, Phillips Medical Systems was selected above. <p>If none are selected, then the search returns data for all manufacturers.</p>

Table 2.3 Modality Manufacturer Search Criteria

4. Choose the DICOM search criteria as shown in [Figure 2.9](#) and described in [Table 2.4](#). For more information on DICOM, see <http://medical.nema.org/>.

DICOM			
0008	103E	Series Description	<input type="text"/>
0018	1210	Convolution Kernel	<input type="text" value="v"/>
0018	0060	Kilovoltage Peak Distribution	<input type="text" value="v"/> <input type="text"/> AND <input type="text" value="v"/> <input type="text"/> <input type="button" value="v"/>

Figure 2.9 DICOM Search Criteria

Criteria	Description
Series Description	Enter your description of the Series. The Series Description is a DICOM tag with a group number of 0008 and element number of 103E.
Convolution Kernel	<p>Select from the available convolution kernels. Convolution kernel is a label describing the convolution kernel or algorithm used to reconstruct the data. The DICOM tag group number is 0018 and the element number is 1210.</p> <p>If none are selected, then the search returns data for all convolution kernels.</p>

Table 2.4 DICOM Search Criteria

Criteria	Description
Kilovoltage Peak Distribution	<p>Kilovoltage Peak Distribution is the kilo voltage output of the x-ray generator used by a modality. The DICOM tag group number is 0018 and the element number is 0060. The DICOM attribute name is KVP.</p> <p>Use the first set of drop-down boxes only (before the AND) to select a peak distribution by using (=), greater than (>) or greater than or equal to (=>).</p> <p>Use both sets of drop-down boxes to select a range of numbers. From the first drop-down box, select greater than (>) or greater than and equal to (=>) and specify a peak distribution. Then, select less than (<) or less than and equal to (=<) from the second drop-down list and specify the maximum peak distribution.</p>

Table 2.4 DICOM Search Criteria (Continued)

5. Click the appropriate button to initiate, enhance or reset the search.
 - a. Click **Submit** to start the search. The Search Criteria and Search Results (by Subject) pages display (see *Viewing Search Results* on page 32).
 - b. Click **Add Keyword Criteria** to enhance the search with selected keywords. This option takes you to the Annotation Keyword Search page. For more information, see *Searching Curation Data* on page 20.
 - c. Click **Reset** to reset the search criteria to their default values.

After the search is submitted, search criteria are summarized in a Criteria Selected table. Search results display below the table. For more information about search results, see *Viewing Search Results* on page 32.

Working with Saved Search Queries

After you launch a search, the Search Criteria page displays the search criteria summary for your review. It allows you to save the query for future use. A text field for entering the query name and a **Save Query** button displays below the search criteria (circled in *Figure 2.10*).

The screenshot shows the 'Search Criteria' page. On the left is a sidebar with navigation links: 'Task List', 'Queries', 'History', 'Spreadsheet', and 'Session'. The main content area is titled 'Search Criteria' and includes a note: '*All searches are conducted at the series level'. Below this is a table titled 'CRITERIA SELECTED' with the following rows:

CRITERIA SELECTED	
BBBBB	> 0.0
Collection(s)	RIDER, TEST
NumericCDE	> 0.0
TestCDE	StudyLevel2, SeriesLevel, PatientLevel2, ImageLevel

Below the table, there is a text input field and a 'SAVE QUERY' button, both of which are circled in red in the original image.

Figure 2.10 Save Query option

Note: If you launched the search from a previously saved query, then the text field and **Save Query** buttons do not display.

Saving a Search Query

To save a search query, perform the following steps:

1. Enter a name for the saved query in the **Save Query** text field.
2. Click the **Save Query** button.

NCIA attempts to save the query and displays a message that indicates the success or failure and suggests any additional actions that are required.

Managing Saved Queries

Click the **View Saved Queries** link in the left sidebar of the viewer to display the Saved Queries page (*Figure 2.11*).

These are your saved queries. If a query has new results, you can click on the icon in the New Data Available column to go directly to only new results. If you resubmit a query, you will be taken directly to all search results, old and new.

☒ REMOVE SELECTED ITEMS

Query Name▼	Last Executed▼	New Data Available	Resubmit Query	Edit Query	<input type="checkbox"/>
Enhanced Query	3/2/06 1:54 PM		RESUBMIT QUERY	EDIT QUERY	<input type="checkbox"/>
CT Query	3/2/06 1:53 PM		RESUBMIT QUERY	EDIT QUERY	<input type="checkbox"/>

Figure 2.11 Saved Queries page

This page displays a table of all queries that are currently saved for you. Table columns are described in *Table 2.5*. The table is sorted in descending order by **Last Executed** date by default. You can also sort by **Query Name** by clicking on the down arrow next to the column title.

Saved Query	Description
Query Name	The name of the query displays as a link. The default is that the criteria themselves do not display. The link toggles whether the criteria for the saved query displays. Click the link to display/not display the criteria selected for the query.
Last Executed	The most recent date and time you executed the query displays. The time is displayed for the Eastern Time (US and Canada) time zone.
New Data Available	An icon appears if new data is available for the saved query. Click the icon to display the results (new data only) on the Search Results page.
Resubmit Query	Click the Resubmit Query button to submit the query using the saved criteria and display the results on the Search Results page. The results contain both old and new data.

Table 2.5 Saved Query descriptions

Saved Query	Description
Edit Query	Click the Edit Query button to display the Search page displaying the criteria that was saved for the query. You can then modify the criteria.
Checkbox	Click the checkbox to mark the query for deletion. You can click the checkbox in the header to select all queries or you can select queries individually.

Table 2.5 *Saved Query descriptions (Continued)*

You can perform the following actions on the Saved Queries page.

- **Remove Selected Items**--Check the box corresponding to any Saved Query line items and click the **Remove Selected Items** button to delete selected saved queries.
After NCIA attempts to delete the queries, it returns you to the **Manage Saved Queries** page; a message displays that indicates the success or failure and suggests any additional actions that are required.
- **View Query History**--Click the **Query History** tab to display the View Query History page (see *Viewing a Query History* on page 31).
- **Resubmit a Saved Query**--If you resubmit a saved query, the name of the saved query displays on the Search Results page with the following message:

These are the results of the {Name} saved query.

If the query is executed for new data only, the following message appears:

These are the results of the {Name} saved query (new data since {Date} only).

{Date} is the last execute date used as part of the criteria of the query to make it only display new results.

Editing Saved Queries

Note: You cannot edit the name of a saved query. You can, however, re-run the query and save this as a new query with a new name. You can then go back and delete the old query.

Perform the following steps to edit a saved query.

1. Click the **Edit Query** button from the Saved Queries page (*Figure 2.11 Saved Queries page* on page 28) to display the Search page containing the criteria that was saved for the query. The name of the saved query being edited is shown in the following information message:
Saved query {Name} is being edited. After pressing Submit and viewing the results, you will have the option to save the changes.
2. Edit the criteria for the saved query and click **Submit**.

3. The Search Criteria page ([Figure 2.12](#)) displays the criteria and the Search Results page displays the results for the edited criteria.

Search Criteria

*All searches are conducted at the series level

CRITERIA SELECTED	
Collection(s)	RIDER
Contrast	Enhanced

Save Query:

☒ Update saved query "Enhanced Query" with the new criteria
☐ Save this criteria as a new saved query called:

 **SAVE QUERY**

Figure 2.12 Save Edited Query

4. Choose one of the following choices (see [Figure 2.12](#)).
- Select **Update saved query {Query Name} with the new criteria** and click **Save Query**.
 - Select **Save this criteria as a new saved query called**, enter a new query name and click **Save Query**.
 - If you do not like the results returned by the criteria, navigate back to the Search page to try again.

If you clicked the **Save Query** button, the system attempts to save the query and displays a message which indicates the success or failure and performs any additional actions that are required.

Viewing a Query History

Click the **View Query History** link in the left sidebar or the **Query History** tab from the Saved Queries page to display the Query History page (see [Figure 2.13](#)). The Query History page displays a table of the last twenty queries that you executed which includes queries that are not saved and saved queries that are resubmitted.

Saved Queries		Query History
Query History		
These are the last twenty queries that have been submitted. A query can be resubmitted by clicking the 'Resubmit Query' button.		
Query Name	Last Executed	Resubmit Query
CT Query	3/6/06 5:53 PM	 RESUBMIT QUERY
No Name Provided	3/6/06 5:53 PM	 RESUBMIT QUERY
CT Query	3/6/06 5:52 PM	 RESUBMIT QUERY
RIDER Query	3/6/06 5:51 PM	 RESUBMIT QUERY
No Name Provided	3/6/06 5:51 PM	 RESUBMIT QUERY

Figure 2.13 Query History page

The Query History table contains the data in [Table 2.6](#).

Field Name	Description
Query Name	<p>The name of the query displays as a link. The link toggles whether the criteria for the saved query is displayed. The text of the link can appear three different ways depending on the situation</p> <ul style="list-style-type: none"> • If the query was not saved, No Name Provided displays as the link. • If the query is a saved query that has not been edited since the last execution date, the name of the saved query is displayed. • If the query is a saved query that has been edited since the last execution date, the name of the saved query is displayed with an asterisk. The asterisk refers to a message at the bottom of the page which is a warning to you that the results are based on the criteria that were used at the time the query was run, not the criteria that is currently saved for the query.
Last Executed	The date and time that you executed the query. The time is displayed for the Eastern Time (US & Canada) time zone.
Resubmit Query	Click the Resubmit Query button to submit the query using the saved criteria. The results display on the Search Results page (see Viewing Search Results on page 32).

Table 2.6 Query History

Click the **Saved Queries** tab to display the Saved Queries page (see [Managing Saved Queries](#) on page 28).

Viewing Search Results

In reviewing search results, it is important to review the hierarchy of submissions in NCIA.

Clinical trial > Patient (Subject) > Study > Series > Images

Search results display first as [Search Results \(by Subject\)](#). As you click on **Show Studies** links in those results, NCIA drills down to [Search Results \(Studies for Subject\)](#) where more details for studies display. From these results, when you click **Show Images** links, the [Search Results \(Images for Series\)](#) display, revealing thumbnail images within a series.

Note: At any point in the process of reviewing results, you can add items--the entire patient, a study, a series, or specific images--to your data basket by selecting the items and clicking the **Add to Basket** button. This identifies objects to be downloaded.

When you download a series that have annotation files (indicated by **Yes** in the **Contains Annotations** column), they are automatically downloaded as well.

Search Results (by Subject)

The Search Results (by Subject [patient]) page displays a table containing the results of the search by subject (*Figure 2.14*). At the bottom right, the numbered sequence of hits in the visible list displays as well as the number of entire hits.

 VIEW MY BASKET

Figure 2.14 Search Results by Subject

Table 2.7 describes each item in the Search Results (by Subject) table.

Search Result	Description
Show Studies	Click this hypertext link to display the studies for this subject.
Trial ID	Trial identification number
Subject ID	Subject identification number
Studies	Contains two numbers: the number of studies that met the criteria / total number of studies for the subject
Series	Contains two numbers: the number of series that met the criteria / total number of series
Checkbox	Click the checkbox to mark the result for addition to your data basket. Click the checkbox in the header to select all results, or you can select results individually.
Location	The location of the image “Local” represents the NCIA imaging archive that you are currently logged into. Other locations are remote sites selected with the Remote Search option. For more information about the Remote Search option, see <i>Specifying Remote Search Sites</i> on page 13.

Table 2.7 Search Results (by Subject)

1. Click any **Show Studies** links to display the studies for this subject where more details for studies display. See *Search Results (Studies for Subject)* on page 35.

Note: If you submitted a query that includes collections to which you do not have access, the following message displays:

Results for the [Collection Name] collection are not included in the results because you do not have access to that collection.

Some search results may display, but results from the disallowed collection are not included. If you specified multiple disallowed collections, the message appears once for each collection.

This situation can occur when you save a query. If a query is saved when you have access to a collection and then resubmit the query later (after your access to the collection has been revoked), the system still has the disallowed collection criteria saved.

2. You can perform the following actions on the Search Results (by Subject) page ([Figure 2.14](#)).
 - Click the down arrow next to a column title to sort the column by that item.
 - Click the **Previous** (or <<) and **Next** (or >>) buttons at the bottom of the table to display the previous or next set of results. The numbers of the results displayed is shown.
 - Click the **Add to Basket** button to add items selected to your data basket (see *Adding Items to Your Basket* on page 38).
 - Click **View My Basket** to display the items in your data basket (see *Managing the Data Basket* on page 39).

Search Results (Studies for Subject)

When you click a study in the [Search Results \(by Subject\)](#) page, the Search Results (Studies for Subject) page opens. This page displays specific information for each study: the **Study ID**, **Date** and **Description** followed by a table containing the details for each study ([Figure 2.15](#)).

Figure 2.16 Images for Series Search Results

Table 2.9 describes each item in the Search Results (Images for Series) table.

Search Result	Description
Subject ID	Subject identification number
Study ID	Study identification number
Date	Date
Modality	Modality
Manufacturer	Name of the manufacturer
Contains Annotations	Displays Yes or No , revealing if there are annotation files. Yes becomes a hypertext link if the series has corresponding annotations for which the content type has been identified by curators. Hover over or click the link to display the annotation content type(s). If annotation files are available, but the content type is not known, Yes displays but is not hypertext.

Table 2.9 Images for Series Search Result fields

You can perform the following actions on the Search Results (Images for Series) page:

- To enlarge an image, float your cursor over an image thumbnail. A larger version of the image displays in the upper right hand corner of the page.
- To check or uncheck all items on the search results page, click the **Check All** or **Uncheck All** buttons. To select individual images, click the image thumbnail checkboxes individually.
- Click the **Add to Basket** button to add selected items selected to your data basket (see *Adding Items to Your Basket* on page 38). Images that you add become highlighted.
- Click **View My Basket** to display the items in your data basket (see *Managing the Data Basket* on page 39).

Working with the Data Basket

As you review search results in NCIA, you can add items at any level to your data basket for subsequent download.

Adding Items to Your Basket

You can add items to your basket at the subject [patient], study, series and images levels.

1. To select items, use the **Check All** and **Uncheck All** buttons above the search results tables to check or uncheck all items on a given search results page or click the corresponding checkboxes for items individually.
2. When satisfied, click the **Add to Basket** button.

The items added to the basket are highlighted.

Managing the Data Basket

Click the **View Contents** link in the left sidebar, **Manage Data Basket** from the top menu bar or the **View My Basket** button from Search Results pages to display the My Data Basket page. This page displays a table of all the items in your data basket (*Figure 2.17*).

My Data Basket

Figure 2.17 My Data Basket page

Table 2.10 describes each item in the Data Basket table.

Data Basket Field	Description
Subject ID	Subject identification number
Study ID	Study identification number
Series ID	Series identification number
Contains Annotations	Displays Yes or No , revealing if there are annotation files. Yes becomes a hypertext link if the series has corresponding annotations for which the content type has been identified by curators. Hover over or click the link to display the annotation content type(s). If annotation files are available, but the content type is not known, Yes displays but is not hypertext.
Number of Images Selected out of Number Available	Contains two numbers: Number of Images Selected / Number Available
Image Size (in MB)	Size of the image file in megabytes
Annotation File Size (in MB)	Size of the annotations file in megabytes. This column is blank if there are no annotations.
Delete	To remove the item from the basket, select the check box and click the Remove Selected Items button.

Table 2.10 My Data Basket field

Data Basket Field	Description
Location	<p>The location of the image</p> <p>“Local” represents the NCIA imaging archive that you are currently logged into. Other locations are remote sites selected with the Remote Search option. For more information about the Remote Search option, see <i>Specifying Remote Search Sites</i> on page 13.</p>

Table 2.10 My Data Basket field (Continued)

The total size of your data basket and the estimated download time displays at the bottom of the My Data Basket page (*Figure 2.17*).

To delete an item from your basket, select the check box of an item and click the **Remove Selected Items** button. You can continue to add items to your data basket from the Search Results pages.

Downloading the Data Basket

Once you are satisfied with your selections, click the **Download** button.

Note: Disable popup blockers before you download the files. If you do not want to download the annotation files, uncheck the **Include annotation files in your download** check box.

The selected images can be downloaded through one of the following modes:

1. HTTP (HTTP threshold is less than 3GB)

If total size is below the HTTP download threshold, a progress bar displays to show the progress of the file being zipped. As the file is zipped, the progress bar updates. Once the file is 100% zipped, enter the path (or destination) where the file should be downloaded on your local workstation. The status of the download, including the percent downloaded, displays until the download is completed.

2. FTP (FTP threshold is greater than 3GB)

If the size is above the HTTP download threshold, the file will be zipped and a message displays indicating that you should expect an email with a link to download the file via FTP. Once you receive the **FTP mail** email, download the file from the FTP site using a FTP client. FTP client software that supports downloads larger than 3 gigabytes is required to download files from the FTP server.

Links to selected tools that can provide this capability:

Note: This list is not an endorsement of the FTP client software. You may choose your own FTP client software.

- Windows

Filezilla: <http://prdownloads.sourceforge.net/filezilla/>

[FileZilla 2 2 16 setup.exe?download](http://prdownloads.sourceforge.net/filezilla/FileZilla_2_2_16_setup.exe?download)

- Macintosh

NetFinder: <http://www.versiontracker.com/dyn/moreinfo/macosx/3107>

Fetch: <http://fetchsoftworks.com/>

Note: The use of the Macintosh FTP clients listed may require you to purchase the tools. In addition to the tools listed, there are free command line tools (type [curl ftp://imaging.nci.nih.gov](http://curlftp://imaging.nci.nih.gov)) included with the Macintosh.

For example, download and install the Filezilla software on your Windows system. Enter the FTP address supplied in the FTP email (for example, <ftp://imaging.nci.nih.gov/>) in the **Address** box. The zip files display under the **Remote Site** panel. Double-click your zip file and the transfer begins.

Obtaining DICOM Viewers

Images in the NCIA repository are stored in the medical image standard, Digital Imaging and Communications in Medicine (DICOM). A DICOM file stores the digital image along with a series of tags that contain metadata about the image such as patient ID, study ID, patient weight, anatomic site, and so forth. For more information about DICOM, see <http://medical.nema.org/>.

Below are selected links to freeware DICOM image viewers, provided for your convenience. This is not an endorsement of the listed viewers. Many other DICOM viewers are available on the Internet.

Note: The images in this *in vivo* image archive must be downloaded before you can view them using the viewers.

- ImageJ (runs on Linux, Mac OS 9, Mac OS X, Windows, and the Sharp Zaurus PDA): <http://rsb.info.nih.gov/ij/>
- OSIRIX (runs on MAC OSX): <http://homepage.mac.com/rossetantoine/osirix/>
- DICOMWorks (runs on PC): <http://www.dicomworks.com/>

Initiating Searches from Other Applications

Searches in NCIA can be launched from other applications. For more information, see *Accessing NCIA from Another Application* on page 11.

CHAPTER 3

NCIA ADMINISTRATION

This chapter discusses administration functions in NCIA.

Topics in this chapter include:

- [Administration Functions Overview](#) on this page
- [Using the Quality Assurance \(QA\) Tool](#) on this page
- [Uploading and Parsing the Curation Spreadsheet](#) on page 45
- [Verifying Submitted Files](#) on page 46

Administration Functions Overview

Administration privileges for NCIA are assigned using the User Provisioning Tool (UPT) by NCICB Application Support personnel.

Administration tools options, all of which are restricted by security, are visible only when a user with Admin privileges logs into NCIA. Admin tasks display as hypertext links under the left sidebar **Tools** menu. Their use is described in the appropriate sections that follow in this chapter.

Using the Quality Assurance (QA) Tool

Note: This administration feature is available only to logged in users who have admin privileges.

When an image is uploaded into NCIA, it is not made public immediately. It goes through a quality assurance process by a curator to ensure no private patient data is available, the image is of good quality, and so forth. The NCIA QA tool allows a curator to evaluate the submission and assign the QA status of an image.

To use the QA tool, follow these steps:

1. Click the **QA Tool** hypertext link under **Tools** on the left sidebar.

On the QA Tool page that opens, the left sidebar is replaced with a tree structure that allows you to navigate through different visibility status, trials, patients, studies and series. When you click on a node in the tree, the information associated with that selection displays in the main section of the page. That is the segment of the page where you can perform actions that manage the status and hence, the visibility of the selected component.

- Click on a series in the left sidebar to display thumbnail views of all images within the series. You can click on an image to open and view the full sized jpeg image (which opens in another browser window).

OR

- As the curator, click on **Not Yet Reviewed**. This option drills down to images, shown in thumbnail.
- To update the status of a tree element, select the item and the status you want to assign it.

Five status options are available. They are described in [Table 3.1](#)

<i>Submitted Image Status</i>	<i>Description</i>
Not yet reviewed status	This status is automatically assigned an image upon submission to the NCIA database.
Not Visible	Images are submitted but not yet visible
Visible	Images are visible
Resend	Submitters needs to resubmit images
Send to Curation	Images are ready to be sent for curation

Table 3.1 *Quality assurance status categories*

- Click **OK**.

Note: While still on this page, you can select other groups to which you assign different visibilities.

The QA status history that displays shows all changes have been to the status of this image.

Date	User	Comment	Old Value	New Value
Aug 15, 2006	shinohaa@mail.nih.gov	s	Not Yet Reviewed	Send to Curation
Aug 15, 2006	shinohaa@mail.nih.gov	g	Send to Curation	Not Yet Reviewed

Figure 3.1 *QA Status History*

6. Click on **View DICOM Header** to view the DICOM header information. This also opens in another browser in table format.
7. To view a full-size copy of the image in JPEG format, click the **View Full Size JPEG** button.
8. The image page also displays an audit trail of the image, the date(s) and person(s) who made changes to the image, associated comments, and the status of the image.

Uploading and Parsing the Curation Spreadsheet

Note: This administration feature is available only to logged in users who have admin privileges.

A user with Admin Curator privileges can upload and manage the parsing of a spreadsheet which contains annotations corresponding to images to which the spreadsheet corresponds. To perform these tasks, follow these steps:

1. Click the **Upload Curation Spreadsheet** hypertext link under **Tools** on the left sidebar.

Note: This option is visible only to persons logged in with admin curator privileges.

2. On the Curation Spreadsheet Upload page that opens, navigate for the file to upload (by clicking the **Browse** button), and click **Upload**. This starts the upload/parsing process.

NCIA performs a quick and preliminary validation review. If obvious errors are discovered in the file to be uploaded, an appropriate message displays immediately on this page. If the spreadsheet passes the first round of validation, a message displays that you will receive an email when the upload is complete and parsed. That email will outline any additional errors that have been detected, if there are any.

Verifying Submitted Files

Note: This administration feature is available only to logged in users who have admin privileges.

When a site submits images to NCIA, a user with admin privileges can verify that the images have been received and monitor the status of the submitted images. This is accomplished in NCIA by generating a report with this information.

To verify image submission, follow these steps:

1. Click the **Verify Submission** hypertext link under **Tools** on the left sidebar.

Note: This option is visible only to persons logged in with admin privileges from the submitting site.

2. On the Verify Submission page that opens, enter the appropriate information for the **Date Range** fields, **From** and **To**, in the Search Criteria form:
3. Press the **Submit** button. The search may take a few moments.

Once completed, the report displays below the Verify Submission form (*Figure 3.2*).

Verify Submission

Sep 29, 2005	31	121	302	11729 (11729 visible Images)	0	0

Project-Site						
RIDER-MDACC						
Date	Patients	Studies	Series	Image	Annotation	Quarantined Files
Oct 18, 2005	1	1	1	1 (1 visible Images)	0	0
Nov 30, 2005	10	70	162	10745 (10745 visible Images)	0	0
Dec 1, 2005	8	27	92	7370 (7370 visible Images)	0	0
Dec 6, 2005	1	2	3	4 (4 visible Images)	0	0
Jan 24, 2006	1	1	2	44 (44 visible Images)	0	0
Jan 26, 2006	1	1	2	139 (139 visible Images)	0	0

Figure 3.2 Verify Submission search criteria and search results

The results include the following information, grouped by project site in table format. Fields are described in *Table 3.2*:

Submitted Files Results Fields	Description
Date	Specified data range
Patients	Number of patients represented in search results
Studies	Number of studies represented in search results
Series	Number of series represented in search results
Image	Number of visible images represented in search results
Annotation	Number of annotation files represented in search results
Quarantined Files	Number of quarantined files represented in search results. Files can be quarantined for a variety of reasons: an unidentified site; required values that were left blank, an invalid header, no manifest in the zip file, and so forth.

Table 3.2 Description of fields in search results for verifying submission to NCIA

On the bottom of the page, a notation displays the number of files in quarantine for which a site cannot be determined (not shown). This can occur when an uploaded file is invalid or so corrupted that the curators cannot tell where it came from.
